Metal L-Trim #200-B (M20B)

Metal Trim

Metal L-Trim is used to provide a clean finished edge at door and window openings or when wallboard abuts dissimilar surfaces such as suspended ceilings, beams, plaster, masonry and concrete. L-Trim is installed after the gypsum panels are already in place, unlike mud-on J, which must be installed during gypsum panel installation. L-Trim is easily attached with screws or nails after the panels are in place. Installation is completed with joint compound for a smooth ready-to-paint surface.

Product Data & Ordering Information

Material: 0.012 min thickness, G30 galvanized
Dimensions: 1-1/4" leg x Width
