

6" Universal Bypass Clip (UBC6-68)

68mils (14ga) Rigid or Deflection Connection Clip

ClarkDietrich's Universal Bypass Clip is used to attach exterior wall studs to the structure of the building and provided either a rigid OR deflection connection. Designed to transfer horizontal and/or vertical loads, the Universal Bypass Clips install easily with screws, powder-actuated fasteners, or welds. This clip is ideal for all medium and large standoff conditions.

For a Rigid Connections

Attach the Universal Bypass Clip to cold-formed steel framing members using (6) #10-16 minimum self-drilling screws (not included) for the 14ga clip and (6) #12-14 minimum self-drilling screws (not included) for the 12ga clip through the clip holes into the steel framing.

For a Deflection Connection

Attach the Universal Bypass Clip to the cold-formed steel framing using (3) #14 Proprietary Deflection Screws (included) through the (3) slotted holes and positioned to allow for the appropriate building deflection. For allowable loads for multiple connection options, reference the Clip & Connector Catalog or www.clarkdietrich.com/UBC for more information.
