

## Spray Rib Lath

### More rigid than diamond lath and helps to prevent plaster loss

3-3/16" wide strips of plain 50lb kraft paper spot attached with glue between the herringbone mesh pattern with seven, 3/8" deep longitudinal solid steel ribs spaced at 3-7/8" intervals across the sheet.

Spray Rib Lath provides the superior strength and exceptional rigidity of regular 3/8" High Rib Lath while the addition of the strips of kraft paper limits the loss of plaster when used over open framing or when spray applied. Spray Rib Lath is not a replacement for Grade-D weather resistant barrier.

Spray Rib Lath is the same as 3/8" High Rib Lath with paper attached and is only available in the West Coast.

### Product Data & Ordering Information:

**Material:** G60 Galvanized Steel

50lb Kraft paper

**Packaged:** 25 bundles or 250 pieces per pallet

Product Code	Wt. per Sq. Yd.	Sheet Size	Pcs./Bdl.	Yds./Bdl.	Yds./Pallet
LARS	3.4 lbs.	27" x 97"	10	20	500

### Code Approvals & Performance Standards

- [ASTM A653](#) Standard Specification for Steel Sheet, Zinc-Coated (Galvanized) or Zinc-Iron Alloy-Coated (Galvannealed) by the Hot-Dip Process
- [ASTM C847](#) Standard Specification for Metal Lath
- [ASTM C1063](#) Standard Specification for Installation of Lathing and Furring to Receive Interior and Exterior Portland Cement-Based Plaster
- [Intertek CCRR-0204](#) Metal Lath - Code Compliance Research Report
- [SDS For ASTM A653 Steel Finishing Products](#) For Interior Finishing and Exterior Finishing

### Storage:

All stored materials shall be kept dry. Materials shall be stacked off the ground, supported on a level platform, and protected from the weather and surface contamination per ASTM C847 and C1063.

### Limitations:

Galvanized steel products should not be used with magnesium oxychloride cement stucco or Portland cement stucco containing calcium chloride additives.
