

BlazeFrame® (DL 2)

“DL 2” (Deep Leg) Two solid legs w/ fire stop on both sides

Composite Fire Stop/Framing for use in fire rated wall assemblies. Provides joint protection for up to 1” with UL 2079 Class II or III Movement Capabilities. Two solid legs supporting “free floating” studs per listed assemblies in UL Fire Resistance Directory.

A 2mm thickness of cured intumescent material adhered to metal profiles provides air, smoke and sound seals. When exposed to heat above 375 degrees Fahrenheit, the intumescent material expands up to 35 times its size. This provides protection from heat and flame passage during a fire event.
