MaxTrak® (SLT) 3” Leg
Slotted Deflection Track for structural wall framing

The MaxTrak (SLT) system is a head-of-wall deflection track that is used for framing exterior curtain walls and non-load bearing interior walls. This system allows for vertical live load movement of the primary structure without transferring axial loads to the wall studs.

The MaxTrak system is attached to the wall studs through vertical slots using waferhead screws creating a positive connection that allows for vertical movement and also eliminates the requirement for lateral bracing near the top of the wall stud. The slots in the track’s 3” legs are designed for a total allowable vertical movement of 2” (1” +/-). The MaxTrak system must be designed to take the end reaction of the wall studs (point loads) by using the allowable loads below.

Product Data & Ordering Information:
Material:  Yield Strength: Grade 33ksi for 33mils & 43mils
Yield Strength: Grade 50ksi for 54mils & 68mils
Coating: CP60 per ASTM C955 (G90 available)
33mils: 20ga STR, 0.0346” Design Thickness, 0.0329” Min. Thickness
43mils: 18ga, 0.0451” Design Thickness, 0.0428” Min. Thickness
54mils: 16ga, 0.0566” Design Thickness, 0.0538” Min. Thickness
68mils: 14ga, 0.0713” Design Thickness, 0.0677” Min. Thickness
Dimensions: 3” legs with an inside depth equal to the depth of the stud
Available in 2-1/2”, 3-5/8”, 4”, 6” and 8” wide systems
Vertical slots are 0.22” wide x 2” long and spaced every 1” o.c.
Track length = 10’-0”

ASTM & Code Standards:
• ANSI / UL 2079 and MaxTrak UL approved systems (See UL Fire Resistance Directory 42XE)
• SDS & Product Certification Information is available at www.clarkdietrich.com/SupportDocs

- #10 x 9/16” wafer head screws shall be used for the stud-to-track connection.
- Screws should be placed a minimum of 3/8” from the end of the stud.
- Allowable loads are also applicable for single stud located at minimum 6” from the end of the MaxTrak.
- Provide a gap of 1-1/8” between end of stud and inside face of track web for screws placed at mid-length of slotted openings.
