Barrier Mesh™ for Security (BM10)
High-strength expanded metal mesh for walls and ceilings

Barrier Mesh™ is a tough, rigid, heavy-gauge steel mesh installed typically onto stud framing (both metal and wood), with gypsum sheathing applied to its surface to conceal the barrier mesh, thereby providing a significant barrier to security breach across that wall system. ClarkDietrich Building Systems’ Barrier Mesh™ (BM) can also be used without sheathing to provide an enhanced protection of security to walls, ceilings as well as floors. Barrier Mesh™ is produced in different size diamonds and gauges for minimum, medium or maximum security protection.

In addition to providing high-strength and fire-resistant protection, Barrier Mesh™ also offers a cost effective and time-saving alternative to reinforced concrete or concrete masonry systems. The Barrier Mesh™ System is designed to attach to metal or wood stud framing, with specially designed Barrier Mesh™ clips, purchased with the Barrier Mesh and shipped together, as a system. ClarkDietrich mesh sheets are 4’x 8’ and sizes in chart below: special order mesh sizes available upon requests with additional lead-time.

Projects Uses:
Correctional facilities, government offices, retail stores, computer rooms, airport security, law enforcement facilities, military facilities or any space that requires substantial barrier protection.

Product Data & Ordering Information:
Material: Type II, Class 1 - Carbon Steel - Mesh, Complying to ASTM F1267 & A1011
(Type II, Class 2 - Galvanized available by special order)
Expanded Metals Manufacturers Association - EMMA 557-15
Sheet Size: 48” x 96” (Tolerance -0, +1/4” / foot of dimension, length & width)

ASTM & Code Standards:
- ASTM F1267 - Standard Specification for Metal, Expanded, Steel
- Type II, Class 1 - Carbon Steel
- Type II, Class 2 - Galvanized
- ASTM A1011/A1011M - Standard Specification for Steel Sheet Hot-Rolled, High-Strength Low-Alloy Carbon
- Permitted for use in UL - Wall Assemblies, see UL R19331 for full listing
- SDS & Product Certification Information is available at www.clarkdietrich.com/SupportDocs

Storage:
All stored materials shall be kept dry. Materials shall be stacked off the ground, supported on a level platform, and protected from the weather and surface contamination.

Sustainability Credits:
